

ABDIAZIZ NOR

SYSTEM DEVELOPER ·
BACKEND & AI SYSTEMS

WORK EXPERIENCE

Software Developer

Independent software project | 2025–Present

- Designed and developed a workforce and shift-scheduling platform with messaging, subscriptions and multilingual support.
- Built and integrated backend services, APIs, databases and authentication.
- Developed features for task management, queue management and workflow automation.
- Worked independently across frontend, backend and cloud deployment.
- Researched and implemented new technologies to gain practical experience in modern software development.

EDUCATIONAL HISTORY

Information Systems Programme

Dalarna University, Sweden | Aug 2023 - present

- Coursework: Programming, Databases, Web Development, AI & Machine Learning, Data Science, IT Project Management

Electrical and Energy Program

Lugnet High School, Sweden | Aug 2019 - Jun 2022

- Track: Computer & Communication Technology. Subjects: Programming 1 & 2, Network Technology, Web Development, Web Server Programming, Computer Technology

PROFILE

System Developer specializing in backend systems, APIs, and AI-powered applications. Focused on clean architecture, reliable logic, and solutions that solve real problems. Currently studying Information Systems (Data Science focus) in Sweden

SKILLS

Languages: Python, Java, C#, TypeScript, JavaScript, Dart

Frameworks & Tools: React, Flutter, Node.js, Tailwind CSS

Data & Cloud: Firebase, MongoDB, Machine Learning (Python), Cloud Deployment

Core Focus: REST APIs, GraphQL, System Architecture, Database Design, AI Automation & Workflow Agents
